

SRS Scheduled Maintenance

Sunday 18th April 2010, 07:00 - 09:00 NZST

SRS Outage

There will be an outage to the SRS on 18th April 2010, 7:00 - 9:00 am NZST to allow an upgrade of the SRS to version 4.2.

We will also be doing some maintenance work on the SRS.

Registrar Impact

The changes should have no impact on registrars.

Protocol

The protocol has been updated with changes to "Registry only" transactions. The changes should have NO impact on Registrars therefore Registrars are NOT required to update their systems.

Summary of the new release of SRS (4.02)

62158 EPP/SRS: Authentication Change (Registry Only)

62881 Bulk ACLAdd improvement (Registry Only)

65470 Searchable ACL content (Registry Only)

RIK and SRS UI

No changes have been made to the SRSCClient and SRS UI applications other than the protocol changes.

Test SRS System

The Test SRS system will continue to mirror the production environment and will receive the new release on the Monday morning after the production release.

RPS (Registrar Pre-release testing system) is currently available for testing IDN functionally until the actual IDN activation date in July 2010. Registrars must not do any testing on the production SRS.
